Unimatrix Matrix System

TDV Dental

Unimatrix matrix system (Kit) is designed for Class II restorations. The preformed sectional matrices are used for their convexity and thinness which allow good restorative build up and tight contact points. The system is quick, easy and comfortable for the patient, this is due to the Unimatrix clamps/rings replacing the conventional matrix holder system.

- Contact points follow tooth natural anatomy reconstruction
- Quick and easy, and comfortable for the patient
- Cost effective & time saving

Each Kit contains 2 clamps + 8 silicone tubes + 100 assorted sectional matrices in small, medium & large sizes.

Root Canal Cleaner

Vericom

Unbeatable Value!
Cheaper than Buy 1 get 1 FREE Offers

Comparable With More Expensive Brands

£14.95
Was £29.95

Super Quality And Value

VER22764 - Well-Prep composed of chelating agent (EDTA) a chelating agent and an oxidising agent. Chelating agent in Well-Prep allows efficient cleaning and easier preparation of the root canal when Urea-peroxide reacts with sodium hypochlorite, pulp debris is lifted out of the canal by the bubbling effect. Well-Prep improves the tubular penetration of endodontic medicaments and filling materials as dentinal tubules are opened. Also, Well-Prep improves the efficiency in injecting into the root canals by including a special lubricant.

- Facile shaping and cleansing of the root canal
- Easy and fast removal of debris
- Encouraging decalcification of dentin and antibacterial effect
- Simple handling of instruments in the canals due to lubricating effect.

3 x 6ml syringes + disposable tips.

Tg Tempolux Temporary Crown & Bridge Material

Technical & General

Tg tempolux is a self curing 10:1 premium bis acrylic temporary crown and bridge material for use in fabrication of temporary crowns and bridges, temporary inlays and onlays, long term temporaries and temporary veneers. It has a top formulation with exemplary material properties due to a novel resin matrix, for high aesthetic short and long term provisionals. Available in the Automix system with 5 useful shades A1, A2, A3, A3.5 and B1.

- Exceptional flexural strength, highest pressure and abrasion resistance.
- Exactly fitted and unstressed due to the slightest polymerisation shrinkage
- Minimal polymerisation temperature during setting
- Defined elastic phase for reliable removal of the provisional
- Brilliant, translucent colours for an exceptional natural aesthetic & fluorescence even in different lighting conditions
- Colour-stable and publishable to a high shine, providing for a natural aesthetic. Its colouration can be individually adjusted, compatible with UV-light-polymerising composites.
- Low polymerisation temperatures prevent pulpal and gingival irritation and damage
- Absolutely colour stable for complete time of wearing, biocompatible, tasteless.

Simply Better! Bio3 Progressive Implants

**Life-Time
Warranty**

**Trusted German
Made Quality**

Progressive Implant is the newest development and being self-tapping it provides perfect fixation and primary stability.

Spiral-shaped implant form with various thread depth is developed for better bone compression.

- Spiral-shaped implant with aggressive thread was developed for a better primary stability, therefore it is recommended to be used in II, III and IV bone tissue types
- Conical implant body perfectly complies with the drill shape for more precision bone fitting
- Implant body tapering makes self-tapping property better. Noninvasive apical implant part prevents from anatomical damaging during sinus lifting
- Platform switching
- Bio3 Implant Surface is the latest generation of dental implant surfaces. It is active and hydrophilic; The increased surface area provides perfect bone–implant connection, the implant has higher primary stability and quick osteointegration. It can be used with one or two stage protoco
