Unimatrix Matrix System

TDV Dental

Unimatrix matrix system (Kit) is designed for Class II restorations. The preformed sectional matrices are used for their convexity and thinness which allow good restorative build up and tight contact points. The system is quick, easy and comfortable for the patient, this is due to the Unimatrix clamps/rings replacing the conventional matrix holder system.

- Contact points follow tooth natural anatomy reconstruction
- Quick and easy, and comfortable for the patient
- Cost effective & time saving

Each Kit contains 2 clamps + 8 silicone tubes + 100 assorted sectional matrices in small, medium & large sizes.

MicroCut Kit With Saw & Sanding Blades

TDV

TDV13520 - MicroCut is a saw bow made of stainless steel yo which saws or interchangeable sanding blades can be attached. It is the only device really assuring safety to the professional and the patient for the removal of resin, adhesive, cement and amalgam excesses from proximals, particularly when access to the interproximal is not possible due to the excessive amounts of filling material. Due to its very thin blade (0.05mm) any damage to the contact points can be eliminated. All components are autoclavable by any means at 126 degree C, 47kPa, 16min. Refills of saw and sanding blades in packs of 5 pieces are available and sold separately.

TDV13521 - Saw Balde Refills (5pk) - Was £10.95 Now £8.95

TUB
Was £5.95

Continu 2 in 1 anti-microbial surface cleaning wipes is an Alcohol Free surface cleaner which offers a 2 in 1 solution that removes dirt or grease whilst disinfecting the treated area to ensure surfaces are clean as well as decontaminated. Ideal for all dental surfaces, including work surfaces, plastics and Dental Chair. Active against bacteria, fungi & viruses (e.g. MRSA including PVL, C.Diff, E.Coli, Salmonella, HIV, Hepatitis B, TB, Legionella, Influenza A and many others) therefore effective to EN test standards for fungi, bacteria & viruses.

- Complies with the HTM01-05
- Water-based solution that is much safer than traditional Alcohol or bleach based products.
- Kills more than 99.999% of harmful micro-organisms in less than 30 seconds.
- Has the same chemical hazard rating as water, therefore very safe on skin.

£19.95
Was £25.95

ECS15711 - Steril-Test is a two step sequential sterilisation integrator which is designed to control the sterilisation process with high steam concentration or for gravitation removal autoclaves. Suitable for all steam sterilisation cycles with standard temperature of 134° C/4 minutes and 121° C/12 minutes. The integrator is completely laminated in order to prevent possible ink realising on sterilised items. It emulates the performance of the biological indicator thank to added features which have been validated by sequential test. Thanks to the two indicator points, it provides more information than a simple non-sequential indicator. Class 6

- Different initial colours show different calibrations
- It enables the control of the sterilisation cycle at different temperatures by using a single product and final black colour does not change nether over time nor if exposed to direct light
- Complying with EN ISO 1114-40-1 Type 6

Tg Tempolux Temporary Crown & Bridge Material (50ml + Mixing tips)

Technical & General

Tg Tempolux is a self curing 10:1 premium bis acrylic temporary crown and bridge material for use in fabrication of temporary crowns and bridges, temporary inlays and onlays, long term temporaries and temporary veneers. It has a formulation with exemplary material properties due to a noval resin matrix for high aesthetic short and long term provisionals. Available in the automix system with 5 useful shades A1, A2, A3, A3.5 and B1.

- Exceptional flexural strength, highest pressure and abrasion resistance
- Exactly fitted and unstressed due to the slightest polymerisation shrinkage.
- Minimum polymerisation temperature during setting
- Defined elastic phase for reliable removal of the provisional
- Brilliant, translucent colours for an exceptional natural aesthetics & fluorescence even in different lighting conditions
- Colour-stable and publishable to high shine, providing for natural aesthetic. Its colouration can be individually adjusted, compatible with UV-light-polymerising composites.
- Low polymerisation temperatures prevent palpal irritation and damage
- Absolutely colour stable for complete time of wearing, biocompatible, tasteless.

Tg ImplaCem Dual Curing Resin Based Implant Cement (5ml)

Technical & General

TGD14160 - MTgImplaCem is the most up-to-date developed luting cement, dual curing, semi-permanent, resin based occlusally stable specially developed for implant-retained restorations and all super structures such as crowns and bridges and is suitable with all material combinations.

- Passes through a plastic phase before final setting thus allowing easy, convenient & clean removal of excess cement
- Very low displacement resistance and thus extremely low film thickness
- Due to highly cross-linked, ductile polymer structure, high compressive strength and hermetic sealing are achieved
- Luted restorations are effortlessly removed without damage with standard devices (Crown Butler, Corona Flex)
- Excess material can easily be removed in large pieces (no crumbling) during plastic phase
- Compatible with all conventional material combination, i.e.Zirconium and metal frameworks, ceramics, titanium
- Antibacterial, eugenol-free, odourless and tasteless; natural opaque colour for screening metallic abutments.

Simply Better! Bio3 Progressive Implants

Bio3
IMPLANTS

**Life-Time
Warranty**

**Trusted German
Made Quality**

Progressive Implant is the newest development and being self-tapping it provides perfect fixation and primary stability.

Spiral-shaped implant form with various thread depth is developed for better bone compression.

- Spiral-shaped implant with aggressive thread was developed for a better primary stability, therefore it is recommended to be used in II, III and IV bone tissue types
- Conical implant body perfectly complies with the drill shape for more precision bone fitting
- Implant body tapering makes self-tapping property better. Noninvasive apical implant part prevents from anatomical damaging during sinus lifting
- Platform switching
- Bio3 Implant Surface is the latest generation of dental implant surfaces. It is active and hydrophilic; The increased surface area provides perfect bone-implant connection, the implant has higher primary stability and quick osteointegration. It can be used with one or two stage protocols
